

The Indiana no call law is wonderful. We no longer receive calls all day and all evening long. I am a mobile worker and would be bothered while working all day by solicitation calls if we did not have this law as written. My evening time is very precious to me and my family and again we would be bothered consistantly. We would have to subscribe to caller id which would cost us more money. So we would be penalized for the sake of the banking industry. I get 25 solicatations from them by mail every week. The same would happen with the phones. Please do not allow this law to be weakened.
